

2021 ANNUAL SUMMARY REPORT CROSS CONNECTION & BACKFLOW PREVENTION

WS Nai	me and PWS ID#: FALCON COVE BEACH WD, 41-00045 Submitted: 03/29/22 10:53 AM
System	Size: Small System, 1-299 connections
ASR Co	ontact Information: (if there are questions about the ASR who should we contact?)
Name:	Charles Dice
Email:	cadice@hotmail.com Phone #: _+1 (503) 436-0146
	ner Base Who does your water system serve? Count each service connection only once, include connections d without a backflow assembly.
Do you	have any residential connections in your water system? How many: 95
Do you	have any high hazard connections in your water system? How many: 0
Do you	have any other types of connections not listed above? How many: 5
allows f small w authority	ng Authority An enabling authority is required for all community water systems. The enabling authority for a water system to discontinue service for various reasons. A sample enabling authority is available for atter systems on our website: www.healthoregon.org/crossconnection . If you have not submitted an enabling y to the State, please complete one and submit it as soon as possible. For water system have an enabling authority? Yes
	ur enabling authority revised within the last year? No
	ection is for Large Systems only (300+ connections)
Certifie	ed Cross Connection Specialist Information:
Name: _	Cert #:
Email A	Address: Phone #:
Does the 1. 2. 3.	bur water system have a current written backflow prevention program plan? e backflow prevention plan include the following: A list of premises where health hazard cross connections exist, including, but not limited to, those listed in Table 42 (High Hazard Table). Procedure for continually evaluating the degree of hazard posed by a water users premises. Procedure for notifying the water user if a non-health hazard or health hazard is identified, and for informing the water user of any corrective action required.
4.	The type of protection required to prevent backflow into the public water supply, commensurate with the degree of hazard that exists on the water user's premises.
	A description of what corrective actions will be taken if a water user fails to comply with the water suppliers cross connection control requirements.
	Current records of approved backflow prevention assemblies installed, inspections completed, test results, and verification of current backflow assembly tester certification.
7.	A public education program about cross connection control.

2021 Assembly Data

How many assemblies are installed in your water system? How many assemblies were tested? How many assemblies passed their annual test? Comments: Double Check Backflow Prevention Assemblies (DC, DCVA, & DCDA) Are there any DCs installed in your water system? How many assemblies are installed in your water system?
