	ner Base Who does your water system serve? Count each service connection o d without a backflow assembly.	nly once, include connections
Do you	have any residential connections in your water system? How many: 7	70
Do you	have any high hazard connections in your water system? How many: C)
Do you	have any other types of connections not listed above? How many: 1	0
allows small w authori Does y	ing Authority An enabling authority is required for all community water system to discontinue service for various reasons. A sample enabling rater systems on our website: www.healthoregon.org/crossconnection . If you have to the State, please complete one and submit it as soon as possible. The water system have an enabling authority? Yes The water reasons are reasons. A sample enabling authority in the last year? No	authority is available for
This s	ection is for Large Systems only (300+ connections)	
Certifi	ed Cross Connection Specialist Information:	
	Cert #:	
		#:
Does th	our water system have a current written backflow prevention program plan? The backflow prevention plan include the following: A list of premises where health hazard cross connections exist, including, but not those listed in Table 42 (High Hazard Table). Procedure for continually evaluating the degree of hazard posed by a water user. Procedure for notifying the water user if a non-health hazard or health hazard is for informing the water user of any corrective action required. The type of protection required to prevent backflow into the public water supply with the degree of hazard that exists on the water user's premises. A description of what corrective actions will be taken if a water user fails to continuate the supply of the public water user fails to continuate the supply of the public water user fails to continuate the supply of the public water user fails to continuate the supply of the public water user fails to continuate the supply of the public water user fails to continuate the supply of the public water user fails to continuate the supply of the public water user fails to continuate the supply of the public water user fails to continuate the supply of the public water user fails to continuate the supply of the public water user fails to continuate the supply of the public water user fails to continuate the supply of the public water user fails to continuate the supply of the public water user fails to continuate the supply of the public water user fails to continue the supply of the public water user fails to continue the supply of the public water user fails to continue the supply of the public water user fails to continue the supply of the public water user fails to continue the supply of the public water user fails to continue the supply of the public water user fails to continue the supply of the public water user fails to continue the supply of the supply of the public water user fails to continue the supply of the sup	rs premises. s identified, and y, commensurate
6.	water suppliers cross connection control requirements. Current records of approved backflow prevention assemblies installed, inspectitest results, and verification of current backflow assembly tester certification. A public education program about cross connection control.	ons completed,

2021 Assembly Data

Reduced Pressure Backflow Prevention Assemblies (R	RP, RPBA, & RPDA)
Are there any RPs installed in your water system?	No
How many assemblies are installed in your water system?	?
How many assemblies were tested?	
How many assemblies passed their annual test?	
How many assemblies failed their annual test?	
Comments:	
Double Check Backflow Prevention Assemblies (DC, I	DCVA, & DCDA)
Are there any DCs installed in your water system?	Yes
How many assemblies are installed in your water system?	? 2
How many assemblies were tested?	0
How many assemblies passed their annual test?	0
How many assemblies failed their annual test?	<u>0</u>
Comments:	
We have contacted to have this testing done ar	nd no business has come out to do the testing yet.
	<u> </u>
Pressure Vacuum Breaker Assemblies (PVB, PVBA, &	& SVBA)
Are there any PVBs installed in your water system?	No
How many assemblies are installed in your water system?	?
How many assemblies were tested?	
How many assemblies passed their annual test?	
flow many assemblies passed their annual test:	
How many assemblies failed their annual test?
