RECEIVED  
JUN 17 2003  
TECHNICAL SERVICES  
DRINKING WATER PROGRAM

Hello Neighbors,

The holidays are over and Frank and I are back from our trip, so it is time for business as usual! We are so glad to be home again, cold wind, ice and all! First of all we want to thank everyone who gave Doris a hand while we were away. Thank you so very much

We're so happy Dean and Joan Meador #42, are back in Corvallis. After talking to Dean, Frank and I went to see Joan at Heart Of The Valley. Joan is doing quite well Hang in there Joan and Dean.

Sandy Wright has been in the hospital several days. Hope she is better and home soon

There will be a coffee Feb. 17th. Helen Fitzgerald and Betty Hale will be hostesses

We have a change in assistant managers. Mr. Bond, as well as Frank and I, feel we really need a couple for the job. Frank needs to have more help than what Doris and I can manage. Paul and June Wilson #5 will be our new assistant managers. Their phone # is 757-1581.

Thank you Doris for all your help in the past.

Frank and Betty

**TO ALL WOODLAND PARK TENANTS**

**ORDINANCE**

February 5, 1996

The Health Department of the State of Oregon has mandated that there be an anti-siphon device, to prevent backflow, on all outside water connections. This mandate is to protect the water system from pollution by an outside source.

There shall and will be a backflow device in use at all times with no exceptions, or the water will be shut off to that connection.

The backflow devices shall and will be inspected and tested annually to ensure that the backflow device is working properly. New connections may not be installed without the written permission of management.

Water Manager

Frank Strome
