CROSS CONNECTION ORDINANCE

Riverboat Village Mobile Park

River Village Mobile Home Park, Public Water System #4100330, located at 95750 Jerrys Flat Road, Gold Beach, Oregon, is a small mobile home park that utilizes a well as the sole source of drinking water for the residents. No other wells or connections exist in the park. All the units in the park are single family dwellings. The park currently has 20 units.

The cross connection contact person for the system is Marie LaBarge. There is no additional staff. Because this system has fewer than 300 connections, no certification is required. Local certified inspectors are available if needed.

River Village Mobile Home Park follows all applicable plumbing codes and will continue to do so in the future in order to insure that the water system at the park remains free of hazards. It is not the intent on the management to have approved backflow assemblies at each service connection, and the responsibility of purchasing, testing, and maintaining all backflow assemblies rests with the mobile home owners.

This ordinance is in effect immediately and will remain so until modified or replaced.
