

Enabling Ordinance

Skyline View District Improvement Co.

PWS ID# **OR4100439**

The Purpose of this ordinance is to protect the health of the people served by this water district by preventing contaminants from flowing backwards into the water supply. This Ordinance is in compliance with OAR 333-061-0070 thru 333-061-0074. This includes installation, maintenance and testing of backflow prevention devices and assemblies; as well as other rules to report backflow data the Oregon Health Authority (Department of Human Services) every year.

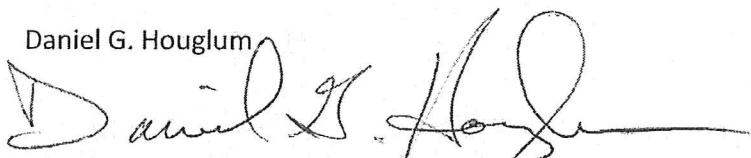

Actual or potential cross connections are prohibited. If a potential exists for a cross connection and this is necessary, the water district must be protected by an appropriate backflow prevention device or assembly. Most high hazards or health hazards are specified in the above listed Oregon Administrative Rules. They should be given the highest priority by our water district.

Skyline View District Improvement Co. has the right to refuse or terminate water service to any customer who does not install a backflow device or assembly, when necessary, test annually and repair if necessary the backflow devices on the customer's property.

Skyline View District Improvement Co. reserves the right to demand a backflow device at the customer's side of the water main if access is not allowed to determine if a backflow device or assembly is necessary.

Skyline View District Improvement Co. will allow a reasonable time to achieve compliance with this ordinance but should an incident occur, the water system has the right to terminate service immediately and restore it only after compliance.

Daniel G. Hougum

President, Skyline View District Improvement Co.
