

# Chehalem Mountain Sunridge Water Company

## Cross Connection Ordinance

41-00562

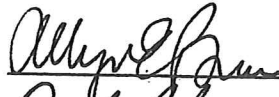

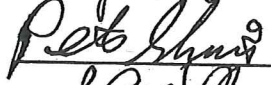

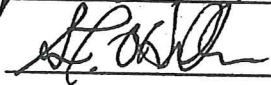

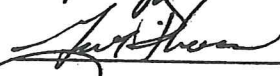

March 2010

The purpose of this ordinance is to protect the water supply of Chehalem Mountain Sunridge Water Company (Company) from contamination or pollution from any cross connections; and to assure that anti-backflow devices are installed on each connection to the water system, tested upon installation, and tested at least annually thereafter. This ordinance is in compliance with Oregon Administrative Rule (OAR) 333-061-0070 and the Uniform Plumbing Code (UPC) as adopted by the State of Oregon.

The Company intends to install approved anti-backflow devices during 2011-12 on each connection to the water system. To ensure compliance with OAR and to facilitate inspection and maintenance all anti-backflow devices will be of the same make and model and will be installed in accordance with UPC. The Company will contract to have anti-backflow devices installed on each connection and landowners will be assessed for installation via the existing special assessment of \$50 per month until paid (estimated to be approximately \$500.00 per connection). The Company will inspect or have inspected annually all anti-backflow devices on the system. An annual assessment will be levied if deemed necessary for inspection of anti-backflow devices.

The installation or maintenance of any unprotected cross connection which would endanger the water supply of the Company is prohibited. Any such cross connection created following installation of anti-backflow devices is hereby declared unlawful and shall be immediately protected or eliminated.

Signed by Chehalem Mountain Sunridge Water Company Board of Directors.
