Fisher Place MHP

**SECTION 13**  
**WATER CONNECTIONS****13.1****Cross Connection Control Program Statement:**

Any connections made, to the Park water system, by a Resident must first be approved by the Park Manager or Owner of the Park. Approval must be obtained prior to any connection. If a connection is allowed, it is mandatory for the Resident to install an approved Back Flow Prevention Device in the connection. Resident must bear all of the costs for the connection and the Back Flow Prevention Device, including annual testing by a licensed approved Back Flow Tester. Management reserves the right to discontinue water service to any Resident premises for failure to install an approved Back Flow Prevention Device on any water connection. Failure to conduct an annual required Back Flow Prevention Device test will also cause the management to discontinue water service to the Resident premises. Any and all installations of water connections to a residence, including a Back Flow Prevention Device, must be inspected by management or an approved Back Flow Prevention Device Tester.
