

## 2023 ANNUAL SUMMARY REPORT CROSS CONNECTION & BACKFLOW PREVENTION

# WS Name and PWS ID#: VENETA, CITY OF, 41-00920

System Size: Large System, 300+ connections

Submitted: <sup>03/06/24</sup> 2:24 PM

**ASR Contact Information:** *(if there are questions about the ASR who should we contact?)* Name: Kyle Schauer

Fmail	kschauer@ci.veneta.or.us	Phone #: +1 (541) 935-2191	
глнан.		$\Gamma \Pi O \Pi O \pi$	

**Customer Base** Who does your water system serve? Count each service connection only once, include connections with and without a backflow assembly.

How many residential connections are in your water system?	1762
How many high hazard connections in your water system?	20
How many other types of connections not listed above?	99

**Enabling Authority** An <u>enabling authority</u> is required for all community water systems. The enabling authority allows for a water system to discontinue service for various reasons. A sample enabling authority is available for small water systems on our website: <u>www.healthoregon.org/crossconnection</u>. If you have not submitted an enabling authority to the State, please complete one and submit it as soon as possible.

### Does your water system have an enabling authority? Yes

Was your enabling authority revised within the last year? No

### This section is for Large Systems only (300+ connections)

Certified Cross Connection Specialist Information:

Certified Cross Connection Specialist Information:		
Name: Kip Orme	Cert #: <u>5423</u>	
Email Address: korme@ci.veneta.or.us	Phone #: +1 (541) 935-219	1
Does your water system have a current written <b>backf</b>	low prevention program plan?	Yes
Does the <b>backflow prevention plan</b> include the follo	owing:	
1. A list of premises where health hazard cross con in Table 42 (High Hazard Table).	nections exist, including, but not limited to, those listed	Yes
2. Procedure for continually evaluating the degree	of hazard posed by a water users premises.	Yes
3. Procedure for notifying the water user if a non-h informing the water user of any corrective action		Yes
4. The type of protection required to prevent backfl degree of hazard that exists on the water user's p	ow into the public water supply, commensurate with the remises.	Yes
5. A description of what corrective actions will be a suppliers cross connection control requirements.	aken if a water user fails to comply with the water	Yes
6. Current records of approved backflow prevention and verification of current backflow assembly te	n assemblies installed, inspections completed, test results, ster certification.	Yes
7. A public education program about cross connect	ion control.	Yes

## **Assembly Data**

### Reduced Pressure Backflow Prevention Assemblies (RP, RPBA, & RPDA)

Are there any RPs installed in your water system? Yes	
How many assemblies are installed in your water system?	201
How many assemblies were tested?	201
How many assemblies passed their annual test?	201
How many assemblies failed their annual test?	0

Comments: Our system was tracking this properly and we corrected it in 2023 that is why this number is so different from years past.

#### Double Check Backflow Prevention Assemblies (DC, DCVA, & DCDA)

Are there any DCs installed in your water system? Yes	
How many assemblies are installed in your water system?	301
How many assemblies were tested?	274
How many assemblies passed their annual test?	274
How many assemblies failed their annual test?	0
27 Assemblies did not get tested due to an error in our reporting system in or Comments:	ur software. That has since been fixed and should not be a problem this year.

### Pressure Vacuum Breaker Assemblies (PVB, PVBA, & SVBA)

Are there any PVBs installed in your water system? Yes	
How many assemblies are installed in your water system?	13
How many assemblies were tested?	13
How many assemblies passed their annual test?	13
How many assemblies failed their annual test?	0
