| Cı        | Customer Base   |  |
| Wl        | Who does your water system serve? Count each service connection only  | y once, include connections with and without a |
| bac       | backflow assembly.  |  |
|           | Number of <b>residential connections</b> in your water system:  | $ \frac{15}{0} $                               |
|           | Number of any high hazard connections in your water system:   | 0  |
|           | Number of <b>other types of connections</b> not listed above:   | 0  |
|           | <b>Total number of service connections:</b>   |  |
| one Do Wa | discontinue service for various reasons. A sample enabling authority is av <a href="https://www.healthoregon.org/crossconnection">www.healthoregon.org/crossconnection</a> . If you have not submitted an enable one and submit it as soon as possible.  Does your water system have an enabling authority? Yes  Was your enabling authority revised within the last year? No  This section is for LARGE SYSTEMS ONLY (Large = 300+ Service Company). | abling authority to the State, please complete |
|           | Certified Cross Connection Specialist Information:  |  |
| Na        | Name:   | Cert #:  |
| En        | Email Address:  | Phone #:                                       |
|           | Does your WS have a current written backflow prevention program Does the backflow prevention plan include the following:  | plan?  |
| 1.        | 1. A list of premises where health hazard cross connections exist, include those listed in Table 42 (High Hazard Table).  | ling, but not limited to,                      |
| 2.        | 2. Procedure for continually evaluating the degree of hazard posed by a   | water users premises.                          |
| 3.        | 3. Procedure for notifying the water user if a non-health hazard or health  | h hazard is identified, and                    |
|           | for informing the water user of any corrective action required.   |  |
| 4.        |   | rater supply, commensurate                     |
|           | with the degree of hazard that exists on the water user's premises.   |  |
| 5.        | 1   | fails to comply with the                       |
| _         | water suppliers cross connection control requirements.  | <u> </u>                                       |
| 6.        | 6. Current records of approved backflow prevention assemblies installed   |  |
| 7         | test results, and verification of current backflow assembly tester certi  | incation.                                      |

## **Assembly Data**

| Reduced Pressure Backflow Prevention Assemblies (RP,   | RPBA, & RPDA)     |  |
|--|-------------------|--|
| Are there any RPs installed in your water system?  | Yes               |  |
| How many assemblies are installed in your water system?  How many assemblies were tested?  How many assemblies passed their annual test?  How many assemblies failed their annual test?      | 4                 |  |
|  | 4                 |  |
