Customer Base

Who does your water system serve? **Count each service connection only once**, include connections with and without a backflow assembly.

| Number of residential connections in your water system: | 163 |
|--|-----|
| Number of any high hazard connections in your water system: | 0 |
| Number of other types of connections not listed above: | 0 |
| Total number of service connections: | |

An **enabling authority** is required for all community water systems. The enabling authority allows for a water system to discontinue service for various reasons. A sample enabling authority is available for small water systems on our website: <u>www.healthoregon.org/crossconnection</u>. If you have not submitted an enabling authority to the State, please complete one and submit it as soon as possible.

Does your water system have an <u>enabling authority</u>? Yes Was your enabling authority revised within the last year? Yes, attach the revised copy below

| is section is for LARGE SYSTEMS ONLY (Large = 300+ Service Connections) | | |

- 1. A list of premises where health hazard cross connections exist, including, but not limited to, those listed in Table 42 (High Hazard Table).
- 2. Procedure for continually evaluating the degree of hazard posed by a water users premises.
- 3. Procedure for notifying the water user if a non-health hazard or health hazard is identified, and for informing the water user of any corrective action required.
- 4. The type of protection required to prevent backflow into the public water supply, commensurate with the degree of hazard that exists on the water user's premises.
- 5. A description of what corrective actions will be taken if a water user fails to comply with the water suppliers cross connection control requirements.
- 6. Current records of approved backflow prevention assemblies installed, inspections completed, test results, and verification of current backflow assembly tester certification.
- 7. A public education program about cross connection control.

Assembly Data

Reduced Pressure Backflow Prevention Assemblies (RP, RPBA, & RPDA)

| Are there any RPs installed in your water system? | Yes |
|---|-----|
| How many assemblies are installed in your water system? | 24 |
| How many assemblies were tested? | 24 |
| How many assemblies passed their annual test? | 22 |
| How many assemblies failed their annual test? | 11 |

Comments: While there as 22 total RP's in the system there is only 1 actual cross connection from an automated sprinkler system. I am recommending when the non essential devices fail customers remove them as they are not required.

Double Check Backflow Prevention Assemblies (DC, DCVA, & DCDA)

| Are there any DCs installed in your water system? | No |
|---|----|
| How many assemblies are installed in your water system? | |
| How many assemblies were tested? | |
| How many assemblies passed their annual test? | |
| How many assemblies failed their annual test? | |
| Comments: | |
| | |

Pressure Vacuum Breaker Assemblies (PVB, PVBA, & SVBA)

| Are there any PVBs installed in your water system? | No |
|---|----|
| How many assemblies are installed in your water system? | |
| How many assemblies were tested? | |
| How many assemblies passed their annual test? | |
| How many assemblies failed their annual test? | |
