| <b>D</b> o    | res your WS have a current written backflow prevention program plan? Yes the backflow prevention plan include the following:  A list of premises where health hazard cross connections exist, including, but not limited to, those listed in Table 42 (High Hazard Table). | Yes                |
| 2.            | Procedure for continually evaluating the degree of hazard posed by a water users premises.   | Yes                |
| 3.            | Procedure for notifying the water user if a non-health hazard or health hazard is identified, and for informing the water user of any corrective action required.  | Yes                |
| 4.            | The type of protection required to prevent backflow into the public water supply, commensurate with the degree of hazard that exists on the water user's premises.   | Yes                |
| 5.            | A description of what corrective actions will be taken if a water user fails to comply with the water suppliers cross connection control requirements.   | Yes                |
| 6.            | Current records of approved backflow prevention assemblies installed, inspections completed,   | Yes                |
|               | test results, and verification of current backflow assembly tester certification.  | 1 62               |
| 7.            | A public education program about cross connection control.   | No                 |

## Assembly Data Reduced Pressure

| Reduced Pressure Backflow Prevention Assemblies (RP,   | Yes                                   |  |
|--|---------------------------------------|--|
| Are there any RPs installed in your water system?  | 106                                   |  |
| How many assemblies are installed in your water system? How many assemblies were tested? How many assemblies passed their annual test? | 106                                   |  |
