### **Customer Base**

Who does your water system serve? **Count each service connection only once**, include connections with and without a backflow assembly.

Number of <b>residential connections</b> in your water system:	32
Number of any <b>high hazard connections</b> in your water system:	0
Number of other types of connections not listed above:	0
Total number of service connections:	

An **enabling authority** is required for all community water systems. The enabling authority allows for a water system to discontinue service for various reasons. A sample enabling authority is available for small water systems on our website: <u>www.healthoregon.org/crossconnection</u>. If you have not submitted an enabling authority to the State, please complete one and submit it as soon as possible.

Does your water system have an <u>enabling authority</u> ?	Yes	
Was your enabling authority revised within the last	year?	No

This section is for LARGE SYSTEMS ONLY (Large = 300+ Service Connections)	
Certified Cross Connection Specialist Information:	

Name:	_ Cert #:
Email Address:	_ Phone #:

### Does your WS have a current written backflow prevention program plan? \_\_\_\_\_\_ Does the <u>backflow prevention plan</u> include the following:

- 1. A list of premises where health hazard cross connections exist, including, but not limited to, those listed in Table 46 (High Hazard Table).
- 2. Procedure for continually evaluating the degree of hazard posed by a water users premises.
- 3. Procedure for notifying the water user if a non-health hazard or health hazard is identified, and for informing the water user of any corrective action required.
- 4. The type of protection required to prevent backflow into the public water supply, commensurate with the degree of hazard that exists on the water user's premises.
- 5. A description of what corrective actions will be taken if a water user fails to comply with the water suppliers cross connection control requirements.
- 6. Current records of approved backflow prevention assemblies installed, inspections completed, test results, and verification of current backflow assembly tester certification.
- 7. A public education program about cross connection control.
