Customer Base Who does your water system serve? Count each service connection only once, include connections with and without a backflow assembly. Number of residential connections in your water system: Number of any high hazard connections in your water system: Number of only high hazard connections in your water system: Number of other types of connections to listed above: Total number of service connections: An enabling authority is required for all community water systems. The enabling authority allows for a water system to discontinue service for various reasons. A sample enabling authority is a wailable for small water systems on our website www.healthoregon.org/crossconnection. If you have not submitted an enabling authority to the State, please complete one and submit it as soon as possible. Does your water system have an enabling authority? Yes Was your enabling authority revised within the last year? This section is for LARGE SYSTEMS ONLY (Large = 300+ Service Connections) Certified Cross Connection Specialist Information: Name: Stephanie M Kerns Cert #: 679558 Email Address: S.Kems@NewportOregon.gov Phone #: -1 (541) 819-7249 Does your WS have a current written backflow prevention program plan? Yes Does the backflow prevention plan include the following: 1. A list of premises where health hazard cross connections exist, including, but not limited to, those listed in Table 46 (High Hazard Table). 2. Procedure for continually evaluating the degree of hazard posed by a water users premises. 3. Procedure for notifying the water user if a non-health hazard or health hazard is identified, and for informing the water user of any corrective action required. 4. The type of protection required to prevent backflow into the public water supply, commensurate with the degree of hazard that exists on the water user's premises. 5. A description of what corrective actions will be taken if a water user fails to comply with the water suppliers cross connection control requirements. 6. Current re	Na	nme: Stephanie Kerns
