

## 2023 ANNUAL SUMMARY REPORT CROSS CONNECTION & BACKFLOW PREVENTION

ASR Contact Information: (if there are questions about the ASR who should we contact?)  Name: JJ Olson  Email: jessicap@hilandwater.com  Phone #: +1 (503) 554-8333   Customer Base Who does your water system serve? Count each service connection only once, include connections with and without a backflow assembly.  How many residential connections are in your water system?  How many high hazard connections in your water system?  How many other types of connections not listed above?  Enabling Authority An enabling authority is required for all community water systems. The enabling authority allows for a water system to discontinue service for various reasons. A sample enabling authority is a vailable for small water systems on our website: <a href="https://www.healthoregon.org/crossconnection.">www.healthoregon.org/crossconnection.</a> For small water systems on our website: <a href="https://www.healthoregon.org/crossconnection.">www.healthoregon.org/crossconnection.</a> For small water systems are enabling authority?  Yes  Was your enabling authority revised within the last year?  No  This section is for Large Systems only (300+ connections)  Certified Cross Connection Specialist Information:  Name: JJ Olson  Cert #:6629  Email Address; jolson@nwnaturalwaterservices.com  Phone #: +1 (503) 554-8333  Does your water system have a current written backflow prevention program plan?  Yes  Does the backflow prevention plan include the following:  A list of premises where health hazard cross connections exist, including, but not limited to, those listed in Table 42 (High Hazard Table).  Procedure for notifying the water user if a non-health hazard or health hazard is identified, and for informing the water user of any corrective action required or health hazard is identified, and for informing the water user of any corrective action required.  The type of protection required to prevent backflow into the public water supply, commensurate with the degree of hazard that exists on the water user's premises. ### **Assembly Data**

### Reduced Pressure Backflow Prevention Assemblies (RP, RPBA, & RPDA)

Are there any RPs installed in your water system? Yes

How many assemblies are installed in your water system?

How many assemblies were tested?

How many assemblies passed their annual test?

5

How many assemblies failed their annual test?

Comments:

# Customer did not respond, subcontracted

#### Double Check Backflow Prevention Assemblies (DC, DCVA, & DCDA)

Are there any DCs installed in your water system? Yes

How many assemblies are installed in your water system? 194

How many assemblies were tested? 169

How many assemblies passed their annual test? 5

How many assemblies failed their annual test?

Comments:

### Pressure Vacuum Breaker Assemblies (PVB, PVBA, & SVBA)

Are there any PVBs installed in your water system? Yes

How many assemblies are installed in your water system? 1

How many assemblies were tested? 0

How many assemblies passed their annual test? 0

How many assemblies failed their annual test? 0

Comments:

# No water flowing to the PVB device
