Comments:

- 5. An **enabling authority** is required for all community water systems. The enabling authority allows for a water system to discontinue service for various reasons. A sample enabling authority is available for small water systems on our website: www.healthoregon.org/crossconnection. If you have not submitted an enabling authority to the State, please complete one and submit it as soon as possible.
- No (see note above) 6. Does your water system have an <u>enabling authority</u>? Xes
- 7. Was your enabling authority revised within the last year?
- Yes, email a copy to the Cross Connection program cross.connection@state.or.us X No

QI	JESTIONS 8 - 10 are for LARGE SYSTEMS ONLY (Large = 300+ Service Connections) and are specific
to	the required written backflow prevention program plan outlined in OAR 333-061-0070(9	<u>)(b)</u>
0	Contified Cross Connection Specialist Information	
ð.	Certified Cross Connection Specialist Information:	
	Name: Cert #:	
	Email Address:	
	Phone #: Alt Phone #:	
9.	Does your water system have a current written backflow prevention program plan?	Yes No
10.	. Does the <u>backflow prevention plan</u> include the following:	
	a. A list of premises where health hazard cross connections exist, including, but not limited to, those listed in Table 42.	Yes No
	b. Procedure for continually evaluating the degree of hazard posed by a water users premises.	Yes No
	c. Procedure for notifying the water user if a non-health hazard or health hazard is identified, and for informing the water user of any corrective action required.	Yes No
	d. The type of protection required to prevent backflow into the public water supply, commensurate with the degree of hazard that exists on the water user's premises.	Yes No
	e. A description of what corrective actions will be taken if a water user fails to comply with the water suppliers cross connection control requirements.	🗖 Yes 🗖 No
	 f. Current records of approved backflow prevention assemblies installed: i. inspections completed, ii. backflow prevention assembly test results on backflow prevention assemblies, iii. verification of current backflow assembly tester certification 	 Yes No Yes No Yes No Yes No
	g. A public education program about cross connection control.	Yes No

11. Are there any backflow assemblies or devices installed in your water system? [Yes]No

12. Do you have any Reduced Pr	ressure Backflow Prevention Assemblies (RP, RPBA, & RPDA) installed in your
water system? 🗌 Yes 🖾 No	(if you answered yes, answer the questions below)
77 1.11	

- a. How many assemblies are installed in your water system?
- b. How many assemblies were tested?
- c. How many assemblies passed their annual test?
- d. How many assemblies failed their annual test?

Comments:

13. Do you have any Double Check Backflow Prevention Assemblies (DC, DCVA, & DCDA) in	stalled in your water
system? \bowtie Yes \square No (if you answered yes, answer the questions below)	
a. How many assemblies are installed in your water system?	<i>l</i>
b. How many assemblies were tested?	0
c. How many assemblies passed their annual test?	Ø
d. How many assemblies failed their annual test?	0
e. Comments:	
14. Do you have any Pressure Vacuum Breaker Assemblies (PVB, PVBA, & SVBA) installed in	your water system?
Yes XNo (if you answered yes, answer the questions below)	

I certify the information provided is true to the best of my knowledge. Providing false information may result in penalties to the individual and to the water system.

Back flow Prevention Program for Quail Valley Parks Improvement District (41-00683) Updated Plan May 1, 2013

This plan supplements state requirements, QVPID approved By-Laws and any other enabling authority. The QVPID includes forty Homesteads and has been in operation since the early 1970's. Most of the Homesteads have been in place for over 30 years. The subdivision is composed entirely of residential homes and absent of any operations identified in Table 48. The subdivision was developed prior to the establishment of Cross Connection Ordinances or enforcement of such ordinances and the rural subdivision was developed and approved without installation of such devises.

Please note it is difficult to get Homeowners to install such devises knowing that each will have to pay an annual inspection fee (tax).

As a result of the above explanation, elements of the QVPID written ordinance is provided as follows:

- 1. If a problem arises we encourage Homeowners to hire a certified plumber to resolve/fix the problem and install appropriate devises.
- 2. QVPID policy requires that as water systems are upgraded or maintained such devises should be installed. QVPID policy does not ban the use of any certain assembly. At this time, we are not aware of any Homesteads that have installed back flow devises. Some had prevention assemblies to protect potable water from irrigation water but due to annual costs the potable water system was separated from irrigation and the devises was no longer needed.
- 3. At annual meetings we advise Homeowners to shut water off when leaving home for extended periods. This will mitigate the back flow of house water into the QVPID water delivery system/pipeline.

In the future, if devises are installed testing will be required.

Prepared and Submitted by H.R. Cosgriffe President, QVPID
