Does y	our water system have a current <u>written backflow prevention program plan</u> ?  ne <u>backflow prevention plan</u> include the following:
1.	A list of premises where health hazard cross connections exist, including, but not limited to, those listed in Table 42 (High Hazard Table).
2.	Procedure for continually evaluating the degree of hazard posed by a water users premises.
3.	Procedure for notifying the water user if a non-health hazard or health hazard is identified, and for informing the water user of any corrective action required.
4.	The type of protection required to prevent backflow into the public water supply, commensurate with the degree of hazard that exists on the water user's premises.
5.	A description of what corrective actions will be taken if a water user fails to comply with the
	water suppliers cross connection control requirements.
6.	Current records of approved backflow prevention assemblies installed, inspections completed, test results, and verification of current backflow assembly tester certification.
7.	A public education program about cross connection control.
