

## 2023 ANNUAL SUMMARY REPORT CROSS CONNECTION & BACKFLOW PREVENTION

# WS Name and PWS ID#: SILVERTON, CITY OF, 41-00823

System Size: Large System, 300+ connections

Submitted: <sup>03/05/24</sup> 10:30 AM

**ASR Contact Information:** *(if there are questions about the ASR who should we contact?)* Name: Melinda M Orozco

Email: morozco@silverton.or.us Phone #: -	-1 (503) 874-2206
---	-------------------

**Customer Base** Who does your water system serve? Count each service connection only once, include connections with and without a backflow assembly.

How many residential connections are in your water system?	2033
How many high hazard connections in your water system?	65
How many other types of connections not listed above?	318

**Enabling Authority** An <u>enabling authority</u> is required for all community water systems. The enabling authority allows for a water system to discontinue service for various reasons. A sample enabling authority is available for small water systems on our website: <u>www.healthoregon.org/crossconnection</u>. If you have not submitted an enabling authority to the State, please complete one and submit it as soon as possible.

## Does your water system have an <u>enabling authority?</u> Yes

Was your enabling authority revised within the last year? No

### This section is for Large Systems only (300+ connections)

Certified Cross Connection Specialist Information:

Do	es your water system have a current written <b>backflow prevention program</b>	olan?	Yes
Do	es the <b>backflow prevention plan</b> include the following:		
1.	A list of premises where health hazard cross connections exist, including, bu in Table 42 (High Hazard Table).	it not limited to, those listed	Yes
2.	Procedure for continually evaluating the degree of hazard posed by a water	users premises.	Yes
3.	Procedure for notifying the water user if a non-health hazard or health hazar informing the water user of any corrective action required.	d is identified, and for	Yes
4.	The type of protection required to prevent backflow into the public water su degree of hazard that exists on the water user's premises.	pply, commensurate with the	Yes
5.	A description of what corrective actions will be taken if a water user fails to suppliers cross connection control requirements.	comply with the water	Yes

- 6. Current records of approved backflow prevention assemblies installed, inspections completed, test results, and verification of current backflow assembly tester certification.
- 7. A public education program about cross connection control.

Yes

Yes

## **Assembly Data**

#### Reduced Pressure Backflow Prevention Assemblies (RP, RPBA, & RPDA)

Are there any RPs installed in your water system? Yes	
How many assemblies are installed in your water system?	183
How many assemblies were tested?	183
How many assemblies passed their annual test?	180
How many assemblies failed their annual test?	3

Comments:

#### Double Check Backflow Prevention Assemblies (DC, DCVA, & DCDA)

Are there any DCs installed in your water system? Yes	
How many assemblies are installed in your water system?	1024
How many assemblies were tested?	1023
How many assemblies passed their annual test?	1009
	14
How many assemblies failed their annual test?	
Comments:	

#### Pressure Vacuum Breaker Assemblies (PVB, PVBA, & SVBA)

Are there any PVBs installed in your water system? Yes	
How many assemblies are installed in your water system?	5
How many assemblies were tested?	5
How many assemblies passed their annual test?	4
How many assemblies failed their annual test?	1
