

2024 ANNUAL SUMMARY REPORT CROSS CONNECTION & BACKFLOW PREVENTION

| ASR Contact Information: (if there are questions about the ASR who should we contact?) Name: Jonathan Woody Email: john@oecadmin.com | Wa | ater System Name & PWS ID#: PP&L-TOKETEE V | VILLAGE, 41-01012 | |
|--|--------------------------------|---|---|--------------------|
| Name: John@occadmin.com Phone #: +1 (541) 643-6137 | Sys | stem Size: Small System, 1-299 connections | Submitted: 02/06/25 5:01 PM | |
| Email: john@occadmin.com Phone #: +1 (541) 643-6137 Customer Base Who does your water system serve? Count each service connection only once, include connections with and without a backflow assembly. Number of residential connections in your water system: 12 1 | | | bout the ASR who should we contact?) | |
| Who does your water system serve? Count each service connection only once, include connections with and without a backflow assembly. Number of residential connections in your water system: Number of any high hazard connections in your water system: Number of other types of connections not listed above: Total number of service connections: An enabling authority is required for all community water systems. The enabling authority allows for a water system to discontinue service for various reasons. A sample enabling authority is available for small water systems on our website www.healthoregon.org/crossconnection. If you have not submitted an enabling authority to the State, please complete one and submit it as soon as possible. Does your water system have an enabling authority? Was your enabling authority revised within the last year? No This section is for LARGE SYSTEMS ONLY (Large = 300+ Service Connections) Certified Cross Connection Specialist Information: Name: Cert #: Email Address: Phone #: Does your WS have a current written backflow prevention program plan? Does the backflow prevention plan include the following: 1. A list of premises where health hazard cross connections exist, including, but not limited to, those listed in Table 42 (High Hazard Table). 2. Procedure for continually evaluating the degree of hazard posed by a water users premises. 3. Procedure for notifying the water user if a non-health hazard or health hazard is identified, and for informing the water user of any corrective action required. | | | Phone #: +1 (541) 643-6137 | |
