Customer Base

Who does your water system serve? **Count each service connection only once**, include connections with and without a backflow assembly.

Number of **residential connections** in your water system: 46

Number of any **high hazard connections** in your water system: 0

Number of **other types of connections** not listed above: 0

Total number of service connections: 46

An **enabling authority** is required for all community water systems. The enabling authority allows for a water system to discontinue service for various reasons. A sample enabling authority is available for small water systems on our website: www.healthoregon.org/crossconnection. If you have not submitted an enabling authority to the State, please complete one and submit it as soon as possible.

Does your water system have an **enabling authority**? Yes

Was your enabling authority revised within the last year? No

This section is for LARGE SYSTEMS ONLY (Large = 300+ Service Connections)

Certified Cross Connection Specialist Information: _____

Name: _____ Cert #: _____

Email Address: _____ Phone #: _____

Does your WS have a current written backflow prevention program plan? _____

Does the backflow prevention plan include the following:

1. A list of premises where health hazard cross connections exist, including, but not limited to, those listed in Table 46 (High Hazard Table). _____
2. Procedure for continually evaluating the degree of hazard posed by a water users premises. _____
3. Procedure for notifying the water user if a non-health hazard or health hazard is identified, and for informing the water user of any corrective action required. _____
4. The type of protection required to prevent backflow into the public water supply, commensurate with the degree of hazard that exists on the water user’s premises. _____
5. A description of what corrective actions will be taken if a water user fails to comply with the water suppliers cross connection control requirements. _____
6. Current records of approved backflow prevention assemblies installed, inspections completed, test results, and verification of current backflow assembly tester certification. _____
7. A public education program about cross connection control. _____

Assembly Data

Reduced Pressure Backflow Prevention Assemblies (RP, RPBA, & RPDA)

Are there any RPs installed in your water system? No

How many assemblies are installed in your water system? _____

How many assemblies were tested? _____

How many assemblies passed their annual test? _____

How many assemblies failed their annual test? _____

Comments: _____

Double Check Backflow Prevention Assemblies (DC, DCVA, & DCDA)

Are there any DCs installed in your water system? No

How many assemblies are installed in your water system? _____

How many assemblies were tested? _____

How many assemblies passed their annual test? _____

How many assemblies failed their annual test? _____

Comments: _____

Pressure Vacuum Breaker Assemblies (PVB, PVBA, & SVBA)

Are there any PVBs installed in your water system? No

How many assemblies are installed in your water system? _____

How many assemblies were tested? _____

How many assemblies passed their annual test? _____

How many assemblies failed their annual test? _____

Comments: _____
