

2023 ANNUAL SUMMARY REPORT CROSS CONNECTION & BACKFLOW PREVENTION

WS Name and PWS ID#: COVE ORCHARD WATER ASSOCIATION, 41-01289

System Size: Small System, 1-299 connections

Submitted: ^{03/25/24} 9:26 PM

ASR Contact Information: (*if there are questions about the ASR who should we contact?*) Name: Jason Kivett

Email: drc.cowa@gmail.com	Phone #:	+1 (971) 998-5051

Customer Base Who does your water system serve? Count each service connection only once, include connections with and without a backflow assembly.

How many residential connections are in your water system?	84
How many high hazard connections in your water system?	1
How many other types of connections not listed above?	2
5 51	

Enabling Authority An <u>enabling authority</u> is required for all community water systems. The enabling authority allows for a water system to discontinue service for various reasons. A sample enabling authority is available for small water systems on our website: <u>www.healthoregon.org/crossconnection</u>. If you have not submitted an enabling authority to the State, please complete one and submit it as soon as possible.

Does your water system have an <u>enabling</u> authority? Yes

Was your enabling authority revised within the last year? No

This section is for Large Systems only (300+ connections)

Certified Cross Connection Specialist Information:

Name:	Cert #:
Email Address:	Phone #:

Does your water system have a current written **backflow prevention program plan**?

Does the backflow prevention plan include the following:

- 1. A list of premises where health hazard cross connections exist, including, but not limited to, those listed in Table 42 (High Hazard Table).
- 2. Procedure for continually evaluating the degree of hazard posed by a water users premises.
- 3. Procedure for notifying the water user if a non-health hazard or health hazard is identified, and for informing the water user of any corrective action required.
- 4. The type of protection required to prevent backflow into the public water supply, commensurate with the degree of hazard that exists on the water user's premises.
- 5. A description of what corrective actions will be taken if a water user fails to comply with the water suppliers cross connection control requirements.
- 6. Current records of approved backflow prevention assemblies installed, inspections completed, test results, and verification of current backflow assembly tester certification.
- 7. A public education program about cross connection control.

Assembly Data

Reduced Pressure Backflow Prevention Assemblies (RP, RPBA, & RPDA)

Are there any RPs installed in your water system? Yes	
How many assemblies are installed in your water system?	1
How many assemblies were tested?	1
How many assemblies passed their annual test?	1
How many assemblies failed their annual test?	0

Comments:

Double Check Backflow Prevention Assemblies (DC, DCVA, & DCDA)

Are there any DCs installed in your water system? Yes	
How many assemblies are installed in your water system?	1
How many assemblies were tested?	1
How many assemblies passed their annual test?	1
How many assemblies failed their annual test?	0
Comments:	

Pressure Vacuum Breaker Assemblies (PVB, PVBA, & SVBA)

Are there any PVBs installed in your water system? <u>No</u>
