	nes your WS have a current written backflow prevention to be the backflow prevention plan include the following:	n program plan?	
1.	A list of premises where health hazard cross connections those listed in Table 42 (High Hazard Table).	exist, including, but not limited to,	
2.	Procedure for continually evaluating the degree of hazard	posed by a water users premises.	
3.	Procedure for notifying the water user if a non-health hazard or health hazard is identified, and for informing the water user of any corrective action required.		
4.	ne type of protection required to prevent backflow into the public water supply, commensurate		
	with the degree of hazard that exists on the water user's premises.		
5.			
6.	Current records of approved backflow prevention assemb		
7	test results, and verification of current backflow assembly		

Assembly Data

$\textbf{Reduced Pressure Backflow Prevention Assemblies} \ (RP,$	RPBA, & RPDA)
Are there any RPs installed in your water system?	No
How many assemblies are installed in your water system?	
How many assemblies were tested?	
How many assemblies passed their annual test?	
How many assemblies failed their annual test?	
Comments:	
Double Check Backflow Prevention Assemblies (DC, DC	VA & DCDA)
Are there any DCs installed in your water system?	No
How many assemblies are installed in your water system?	
How many assemblies were tested?	
How many assemblies passed their annual test?	
How many assemblies failed their annual test?	
Comments:	
Pressure Vacuum Breaker Assemblies (PVB, PVBA, & S	VBA)
Are there any PVBs installed in your water system?	No
How many assemblies are installed in your water system?	
How many assemblies were tested?	
How many assemblies passed their annual test?	
How many assemblies failed their annual test?
