

### 2023 ANNUAL SUMMARY REPORT CROSS CONNECTION & BACKFLOW PREVENTION

# WS Name and PWS ID#: SOUTH YAMHILL WATER DISTRICT, 41-01323

System Size: Small System, 1-299 connections

**Submitted:** <sup>03/31/24</sup> 7:37 AM

ASR Contact Information: *(if there are questions about the ASR who should we contact?)* Name: Melanie Eaton, Secretary, South Yamhill Water Co.

Email: eatonmelanie3@gmail.com

Phone #: +1 (503) 857-3320

**Customer Base** Who does your water system serve? Count each service connection only once, include connections with and without a backflow assembly.

| How many residential connections are in your water system? | 19 |
|------------------------------------------------------------|----|
| How many high hazard connections in your water system?     | 0  |
| How many other types of connections not listed above?      | 1  |

**Enabling Authority** An <u>enabling authority</u> is required for all community water systems. The enabling authority allows for a water system to discontinue service for various reasons. A sample enabling authority is available for small water systems on our website: <u>www.healthoregon.org/crossconnection</u>. If you have not submitted an enabling authority to the State, please complete one and submit it as soon as possible.

# Does your water system have an <u>enabling</u> authority? Yes

Was your enabling authority revised within the last year? No

#### This section is for Large Systems only (300+ connections)

Certified Cross Connection Specialist Information:

| Name:          | Cert #:  |
|----------------|----------|
| Email Address. | Phone #: |

Email Address:

Does your water system have a current written backflow prevention program plan?

Does the **backflow prevention plan** include the following:

- 1. A list of premises where health hazard cross connections exist, including, but not limited to, those listed in Table 42 (High Hazard Table).
- 2. Procedure for continually evaluating the degree of hazard posed by a water users premises.
- 3. Procedure for notifying the water user if a non-health hazard or health hazard is identified, and for informing the water user of any corrective action required.
- 4. The type of protection required to prevent backflow into the public water supply, commensurate with the degree of hazard that exists on the water user's premises.
- 5. A description of what corrective actions will be taken if a water user fails to comply with the water suppliers cross connection control requirements.
- 6. Current records of approved backflow prevention assemblies installed, inspections completed, test results, and verification of current backflow assembly tester certification.
- 7. A public education program about cross connection control.

# **Assembly Data**

| Reduced Pressure Backflow Prevention Assemblies (RP, RPBA, & RPDA) |  |  |  |  |
|--------------------------------------------------------------------|--|--|--|--|
| Are there any RPs installed in your water system? No               |  |  |  |  |
| How many assemblies are installed in your water system?            |  |  |  |  |
| How many assemblies were tested?                                   |  |  |  |  |
| How many assemblies passed their annual test?                      |  |  |  |  |
| How many assemblies failed their annual test?                      |  |  |  |  |
| Comments:                                                          |  |  |  |  |
|                                                                    |  |  |  |  |
|                                                                    |  |  |  |  |

### Double Check Backflow Prevention Assemblies (DC, DCVA, & DCDA)

| Are there any DCs installed in your water system? No    |  |
|---------------------------------------------------------|--|
| How many assemblies are installed in your water system? |  |
| How many assemblies were tested?                        |  |
| How many assemblies passed their annual test?           |  |
| How many assemblies failed their annual test?           |  |
| Comments:                                               |  |

### Pressure Vacuum Breaker Assemblies (PVB, PVBA, & SVBA)

| Are there any PVBs installed in your water system? No   |       |      |
|---------------------------------------------------------|-------|------|
| How many assemblies are installed in your water system? |       |      |
| How many assemblies were tested?                        |       |      |
| How many assemblies passed their annual test?           |       |      |
| How many assemblies failed their annual test?           | <br>- |      |
| Comments:                                               | <br>  | <br> |
|                                                         |       | <br> |
|                                                         |       |      |
