Does your water system have a current written **backflow prevention program plan**?

Does the **backflow prevention plan** include the following:

- 1. A list of premises where health hazard cross connections exist, including, but not limited to, those listed in Table 42 (High Hazard Table).
- 2. Procedure for continually evaluating the degree of hazard posed by a water users premises.
- 3. Procedure for notifying the water user if a non-health hazard or health hazard is identified, and for informing the water user of any corrective action required.
- 4. The type of protection required to prevent backflow into the public water supply, commensurate with the degree of hazard that exists on the water user's premises.
- 5. A description of what corrective actions will be taken if a water user fails to comply with the water suppliers cross connection control requirements.
- 6. Current records of approved backflow prevention assemblies installed, inspections completed, test results, and verification of current backflow assembly tester certification.
- 7. A public education program about cross connection control.
