

## 2024 ANNUAL SUMMARY REPORT CROSS CONNECTION & BACKFLOW PREVENTION

W	tter System Name & PWS ID#: CANYON RIDGE, 41-01539
Sy	stem Size: Small System, 1-299 connections  Submitted: 03/22/25 1:56 PM
	R Contact Information: (if there are questions about the ASR who should we contact?) me: Eric Chamberlain
En	ail: echamberlain74@gmail.com Phone #: +1 (541) 233-8817
W	stomer Base to does your water system serve? Count each service connection only once, include connections with and without a skflow assembly.  Number of residential connections in your water system:  Number of any high hazard connections in your water system:  Number of other types of connections not listed above:    O
	Number of any <b>high hazard connections</b> in your water system: $\frac{0}{0}$ Number of <b>other types of connections</b> not listed above: $\frac{0}{0}$
	Total number of service connections:
one Do	continue service for various reasons. A sample enabling authority is available for small water systems on our website rw.healthoregon.org/crossconnection. If you have not submitted an enabling authority to the State, please complete and submit it as soon as possible.  The syour water system have an enabling authority?  The syour enabling authority revised within the last year?  The section is for LARGE SYSTEMS ONLY (Large 2001 Service Connection)
	is section is for LARGE SYSTEMS ONLY (Large = 300+ Service Connections) rtified Cross Connection Specialist Information:
	me:Cert #:
En	ail Address: Phone #:
	es your WS have a current written backflow prevention program plan?es the backflow prevention plan include the following:
1.	A list of premises where health hazard cross connections exist, including, but not limited to, those listed in Table 46 (High Hazard Table).
2. 3.	Procedure for continually evaluating the degree of hazard posed by a water users premises.  Procedure for notifying the water user if a non-health hazard or health hazard is identified, and for informing the water user of any corrective action required.
4.	The type of protection required to prevent backflow into the public water supply, commensurate with the degree of hazard that exists on the water user's premises.
5.	A description of what corrective actions will be taken if a water user fails to comply with the water suppliers cross connection control requirements.
6.	Current records of approved backflow prevention assemblies installed, inspections completed,

## Assembly Data Reduced Pressure Backflow Prevention Assemblies (RP, RPBA, & RPDA) Are there any RPs installed in your water system? How many assemblies are installed in your water system? How many assemblies were tested? How many assemblies passed their annual test? How many assemblies failed their annual test? Comments:
