#### **Customer Base**

Who does your water system serve? **Count each service connection only once**, include connections with and without a backflow assembly.

| Number of residential connections in your water system:     | 21 |
|---|----|
| Number of any high hazard connections in your water system: | 0  |
| Number of other types of connections not listed above:      | 0  |
| Total number of service connections:                        |    |

An **enabling authority** is required for all community water systems. The enabling authority allows for a water system to discontinue service for various reasons. A sample enabling authority is available for small water systems on our website: <u>www.healthoregon.org/crossconnection</u>. If you have not submitted an enabling authority to the State, please complete one and submit it as soon as possible.

| Does your water system have an <u>enabling authority</u> ? | Yes  |    |
|--|------|----|
| Was your enabling authority revised within the last y      | ear? | No |

This section is for LARGE SYSTEMS ONLY (Large = 300+ Service Connections) Certified Cross Connection Specialist Information:

| Name:          | _ Cert #:  |
|----------------|------------|
| Email Address: | _ Phone #: |

#### Does your WS have a current written backflow prevention program plan? \_\_\_\_\_\_ Does the <u>backflow prevention plan</u> include the following:

- 1. A list of premises where health hazard cross connections exist, including, but not limited to, those listed in Table 46 (High Hazard Table).
- 2. Procedure for continually evaluating the degree of hazard posed by a water users premises.
- 3. Procedure for notifying the water user if a non-health hazard or health hazard is identified, and for informing the water user of any corrective action required.
- 4. The type of protection required to prevent backflow into the public water supply, commensurate with the degree of hazard that exists on the water user's premises.
- 5. A description of what corrective actions will be taken if a water user fails to comply with the water suppliers cross connection control requirements.
- 6. Current records of approved backflow prevention assemblies installed, inspections completed, test results, and verification of current backflow assembly tester certification.
- 7. A public education program about cross connection control.

# Assembly Data

| Reduced Pressure Backflow Prevention Assemblies (RP, | RPBA, & RPDA) |
|--|---------------|
|--|---------------|

| Are there any RPs installed in your water system?       | No |  |
|---|----|--|
| How many assemblies are installed in your water system? |    |  |
| How many assemblies were tested?                        |    |  |
| How many assemblies passed their annual test?           |    |  |
| How many assemblies failed their annual test?           |    |  |
| Comments:   |    |  |
|   |    |  |

### **Double Check Backflow Prevention Assemblies** (DC, DCVA, & DCDA)

| Are there any DCs installed in your water system?       | Yes |
|---|-----|
| How many assemblies are installed in your water system? | 8   |
| How many assemblies were tested?                        | 6   |
| How many assemblies passed their annual test?           | 5   |
| How many assemblies failed their annual test?           | 1   |
| Comments:   |     |

# Pressure Vacuum Breaker Assemblies (PVB, PVBA, & SVBA)

|   | ,  |
|---|----|
| Are there any PVBs installed in your water system?      | No |
| How many assemblies are installed in your water system? |    |
| How many assemblies were tested?                        |    |
| How many assemblies passed their annual test?           |    |
| How many assemblies failed their annual test?           |    |
