s your water system have a current written backflow prevention program plan?	Yes No
s the backflow prevention plan include the following:	
A list of premises where health hazard cross connections exist, including, but not limited to, nose listed in Table 42 (High Hazard Table).	Yes No
rocedure for continually evaluating the degree of hazard posed by a water users remises.	Yes No
rocedure for notifying the water user if a non-health hazard or health hazard is dentified, and for informing the water user of any corrective action required.	Yes No
The type of protection required to prevent backflow into the public water supply, ommensurate with the degree of hazard that exists on the water user's premises.	Yes No
description of what corrective actions will be taken if a water user fails to comply with the water suppliers cross connection control requirements.	Yes No
Current records of approved backflow prevention assemblies installed, inspections ompleted, test results, and verification of current backflow assembly tester certification	Yes No n.
a public education program about cross connection control.	Yes No
you have any Daduced Pressure Rackflow Prevention Assemblies (PD DDRA & DDDA) in	stalled in your
er system? Yes No (if you answered yes, answer the questions below) How many assemblies are installed in your water system?	staticu in your
How many assemblies were tested?	
How many assemblies passed their annual test?	
How many assemblies failed their annual test? Comments:	
	A list of premises where health hazard cross connections exist, including, but not limited to, nose listed in Table 42 (High Hazard Table). Trocedure for continually evaluating the degree of hazard posed by a water users remises. Trocedure for notifying the water user if a non-health hazard or health hazard is dentified, and for informing the water user of any corrective action required. The type of protection required to prevent backflow into the public water supply, commensurate with the degree of hazard that exists on the water user's premises. A description of what corrective actions will be taken if a water user fails to comply with the water suppliers cross connection control requirements. Current records of approved backflow prevention assemblies installed, inspections completed, test results, and verification of current backflow assembly tester certification a public education program about cross connection control. Too have any Reduced Pressure Backflow Prevention Assemblies (RP, RPBA, & RPDA) in the system? Set No. (if you answered yes, answer the questions below) How many assemblies are installed in your water system? How many assemblies were tested? How many assemblies failed their annual test?

12.	Do	you have any Double Check Backflow Prevention Assemblies (DC, DCVA, & DCDA) installed in your water		
1	sys	tem? Yes No (if you answered yes, answer the questions below)		
;	a.	How many assemblies are installed in your water system?		
1	b.	How many assemblies were tested?		
	c.	How many assemblies passed their annual test?		
(d.	How many assemblies failed their annual test?		
•	e.	Comments:		
13.	Do	you have any Pressure Vacuum Breaker Assemblies (PVB, PVBA, & SVBA) installed in your water system?		
١		Yes No (if you answered yes, answer the questions below)		
1	a.	How many assemblies are installed in your water system?		
1	b.	How many assemblies were tested?		
•	c.	How many assemblies passed their annual test?		
•	d.	How many assemblies failed their annual test?		
•	Э.	Comments:		
		y the information provided is true to the best of my knowledge. Providing false information may result in es to the individual and to the water system.
