1. Water System Name:
 PWS ID\# 41- 91556
2. What size is your water system? $\square$ Small (1-299 connections) $\square$ Large ( $300+$ connections)
3. ASR Contact Information: (if there are questions about the ASR who should we contact?)

Name: $\qquad$
Email: $\qquad$ Phone \#: $\qquad$
4. Customer Base: Who does your water system serve? Count each service connection only once, include connections with and without a backflow assembly.
a. Do you have any residential connections in your water system?
$\square$ Yes $\square$ No How many: 16
b. Do you have any high hazard connections in your water system?
$\square$ Yes $\square$ No How many: $\qquad$
c. Do you have any other types of connections not listed above?
$\square$ Yes $\square$ No How many: $\qquad$ Comments: Our communal bathroom/Shaver/laundry room. As well
as the main store are potential high hazard connections, due to
Possibility of backflow into the System.
5. An enabling authority is required for all community water systems. The enabling authority allows for a water system to discontinue service for various reasons. A sample enabling authority is available for small water systems on our website: www.healthoregon.org/crossconnection. If you have not submitted an enabling authority to the State, please complete one and submit it as soon as possible.
6. Does your water system have an enabling authority? $\square$ Yes $\quad \square$ No (see note above)
7. Was your enabling authority revised within the last year?
$\square$ Yes, email a copy to the Cross Connection program cross.connection@state.or.us $\square$ No

QUESTIONS 8-10 are for LARGE SYSTEMS ONLY (Large $=300+$ Service Connections) and are specific to the required written backflow prevention program plan outlined in OAR 333-061-0070(9)(b)
8. Certified Cross Connection Specialist Information:Water system EmployeeContracted service
Name:
Email Address: Cert \#: $\qquad$
Phone \#: $\qquad$ Alt Phone \#:
9. Does your water system have a current written backflow prevention program plan?

10. Does the backflow prevention plan include the following:
a. A list of premises where health hazard cross connections exist, including, but not limited to, those listed in Table 42.
b. Procedure for continually evaluating the degree of hazard posed by a water users premises.
c. Procedure for notifying the water user if a non-health hazard or health hazard is identified, and for informing the water user of any corrective action required.
$\square$ Yes $\square$ No
d. The type of protection required to prevent backflow into the public water supply, commensurate with the degree of hazard that exists on the water user's premises.
$\square$ Yes $\square$ No
e. A description of what corrective actions will be taken if a water user fails to comply with the water suppliers cross connection control requirements.
$\square$ Yes $\square$ No
f. Current records of approved backflow prevention assemblies installed:
i. inspections completed,
ii. backflow prevention assembly test results on backflow prevention assemblies,
iii. verification of current backflow assembly tester certification

g. A public education program about cross connection control.

```

11. Are there any backflow assemblies or devices installed in your water system? $\nabla_{\text {Yes }}$ $\square \mathrm{No}$
12. Do you have any Reduced Pressure Backflow Prevention Assemblies (RP, RPBA, \& RPDA) installed in your water system? $\square$ Yes $\square$ No (if you answered yes, answer the questions below)
a. How many assemblies are installed in your water system?
b. How many assemblies were tested?
c. How many assemblies passed their annual test?
d. How many assemblies failed their annual test? Comments: $\qquad$
13. Do you have any Double Check Backflow Prevention Assemblies (DC, DCVA, \& DCDA) installed in your water system? $\square$ Yes $\square$ No (if you answered yes, answer the questions below)
a. How many assemblies are installed in your water system?
b. How many assemblies were tested?
c. How many assemblies passed their annual test?
d. How many assemblies failed their annual test?
e. Comments: $\qquad$
14. Do you have any Pressure Vacuum Breaker Assemblies (PVB, PVBA, \& SVBA) installed in your water system?Yes (if you answered yes, answer the questions below)
a. How many assemblies are installed in your water system?
b. How many assemblies were tested?
c. How many assemblies passed their annual test?
d. How many assemblies failed their annual test?
e. Comments: $\qquad$

I certify the information provided is true to the best of my knowledge. Providing false information may result in penalties to the individual and to the water system.
