

2021 ANNUAL SUMMARY REPORT
 CROSS CONNECTION & BACKFLOW PREVENTION

Received
 July 19 2023
 Cross Connection

Please fill out the Annual Summary Report accurately and completely with **data from 2021**. Keep a completed copy for your records.

PLEASE ANSWER ALL QUESTIONS. INCOMPLETE REPORTS WILL DELAY PROCESSING.

Return completed reports by **March 31, 2022**

Email: cross.connection@dhsosha.state.or.us, Fax: 971-673-0694

Mail: DWS-Cross Connection; 800 NE Oregon Street, Suite 640; Portland, OR 97293

1. Water System Name: Hope Valley Resort PWS ID# 41- 93698

2. What size is your water system? Small (1-299 connections) Large (300+ connections)

3. ASR Contact Information: (if there are questions about the ASR who should we contact?)

Name: megan alexander

Email: megan_alexander@equitylifestyle.com Phone #: 503 363 7666
or
503 991 8697

4. Customer Base: Who does your water system serve? Count each service connection only once, include connections with and without a backflow assembly.

a. Do you have any residential connections in your water system? Yes No How many: 175

b. Do you have any high hazard connections in your water system? Yes No How many: _____

c. Do you have any other types of connections not listed above? Yes No How many: _____

Comments: _____

5. An **enabling authority** is required for all community water systems. The enabling authority allows for a water system to discontinue service for various reasons. A sample enabling authority is available for small water systems on our website: www.healthoregon.org/crossconnection. If you have not submitted an enabling authority to the State, please complete one and submit it as soon as possible.

6. Does your water system have an **enabling authority**? Yes No (see note above)

7. Was your enabling authority revised within the last year?

Yes, email a copy to the Cross Connection program cross.connection@state.or.us No

QUESTIONS 8 - 10 are for **LARGE SYSTEMS ONLY** (Large = 300+ Service Connections) and are specific to the required **written backflow prevention program plan** outlined in **OAR 333-061-0070(9)(b)**

8. Certified Cross Connection Specialist Information:

Water system Employee Contracted service

Name: _____ Cert #: _____

Email Address: _____

Phone #: _____ Alt Phone #: _____

9. Does your water system have a current written backflow prevention program plan? Yes No

10. Does the backflow prevention plan include the following:

a. A list of premises where health hazard cross connections exist, including, but not limited to, those listed in Table 42. Yes No

b. Procedure for continually evaluating the degree of hazard posed by a water users premises. Yes No

c. Procedure for notifying the water user if a non-health hazard or health hazard is identified, and for informing the water user of any corrective action required. Yes No

d. The type of protection required to prevent backflow into the public water supply, commensurate with the degree of hazard that exists on the water user's premises. Yes No

e. A description of what corrective actions will be taken if a water user fails to comply with the water suppliers cross connection control requirements. Yes No

f. Current records of approved backflow prevention assemblies installed: Yes No

i. inspections completed, Yes No

ii. backflow prevention assembly test results on backflow prevention assemblies, Yes No

iii. verification of current backflow assembly tester certification Yes No

g. A public education program about cross connection control. Yes No

11. Are there any backflow assemblies or devices installed in your water system? Yes No

12. Do you have any Reduced Pressure Backflow Prevention Assemblies (RP, RPBA, & RPDA) installed in your water system? Yes No (if you answered yes, answer the questions below)

a. How many assemblies are installed in your water system? _____

b. How many assemblies were tested? _____

c. How many assemblies passed their annual test? _____

d. How many assemblies failed their annual test? _____

Comments: _____

13. Do you have any **Double Check Backflow Prevention Assemblies** (DC, DCVA, & DCDA) installed in your water system? Yes No (if you answered yes, answer the questions below)

- a. How many assemblies are installed in your water system? 50
- b. How many assemblies were tested? 44
- c. How many assemblies passed their annual test? 44
- d. How many assemblies failed their annual test? 0
- e. Comments: could not find 6 of the assemblies

14. Do you have any **Pressure Vacuum Breaker Assemblies** (PVB, PVBA, & SVBA) installed in your water system?

- Yes No (if you answered yes, answer the questions below)
- a. How many assemblies are installed in your water system? _____
 - b. How many assemblies were tested? _____
 - c. How many assemblies passed their annual test? _____
 - d. How many assemblies failed their annual test? _____
 - e. Comments: _____

I certify the information provided is true to the best of my knowledge. Providing false information may result in penalties to the individual and to the water system.

Enabling Authority

Water System Name: Hope Valley Resort

Water System PWS ID # 41- 9369B Revised Date: 2-15-2022

Purpose

The purpose of this ordinance is to protect the health of the people served by this water system by preventing contaminants from flowing backwards into the water supply. To accomplish this, these rules are in compliance with Oregon Administrative Rules (OARs) 333-061-0070 through 333-061-0074.

Requirements

Actual or potential cross connections are prohibited. If a potential exists for a cross connection the water system must be protected by an appropriate backflow prevention device or assembly.

Any high hazards, as specified in the OARs will be given the highest priority, and protected with an approved air gap or reduced pressure backflow assembly.

Enforcement

The water system has the right to refuse or terminate water service to any customer who does not:

- Install a backflow device or assembly, when an actual or potential cross connection exists.
- Test the assembly at least annually and complete necessary repairs

The water system reserves the right to require a backflow device at the customer's side of the water meter if access is not allowed to determine if a backflow device or assembly is necessary.

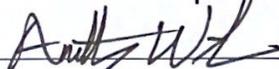

The water system will allow a reasonable time to achieve compliance with our rules, but should a backflow incident occur, the water system has the right to terminate service immediately and restore it only after compliance.

Additional

A list of all high hazard connections and how they are protected from a cross connection is attached to this enabling authority.

This enabling authority is approved and adopted and will remain in effect as of this date until such time as revised or eliminated.
