RE: Administrative Notice for failure to submit lead and copper sampling results. Must report sample results before October 10, 2021.

Dear JOSE A MONTOYA,

This letter is to inform you that lead and copper sampling results have not been submitted for PWS # OR4101308 during the previous monitoring period.

5 LCR samples to be collected every 3 years

This is a violation of Oregon Administrative Rule 333-061-0036(10) or OAR 333-061-0040.

LCR samples must be collected during the warmest part of the year, which has been determined to be between June 1 and September 30. Be sure to collect your water samples early enough to allow laboratories time to perform the sample analysis and report on time.

Sampling results must be received by DWS no later than October 10, 2021.

You can submit sampling results to DWS using one of the following methods:

- Fax the report to (971) 673-0694

*For faxed data, please include a cover sheet with the number of pages including the cover, your name, and your phone number.*

- Email the report to: [dwp.dmce@state.or.us](mailto:dwp.dmce@state.or.us)

- Mail the report to:      Water Quality Reports  
                                     P.O. Box 14350  
                                     Portland, OR 97293-0350

If the required sampling results are not received by July 31, it may result in enforcement action, which could include the assessment of civil penalties.

As a reminder, you must notify those drinking the water at each location of the test results within 30 days of receiving them from the lab. A representative copy of the notice and certification of distribution must be submitted by December 31st. The notification must also include the maximum contaminant level goal and the action level for lead with the definitions for these two terms, an explanation of the health effects of lead, a list steps consumers can take to reduce exposure to lead in drinking water and contact information for your water utility.

Please contact Sarah Schwab with DEPT OF AGRICULTURE at (503) 508-6028 if you have any questions.

Your immediate attention to this matter is appreciated.

Respectfully,

Drinking Water Services
