RE: Warning letter for failure to report coliform bacteria monitoring for the Vernonia Golf Club public water system, PWS ID# 93791

Dear Mr. Zavales

This letter is to inform you that coliform bacteria monitoring has not been reported for your water system since March 21, 2019.

This is a violation of Oregon Administrative Rule (OAR) 333-061-0036(6) if the monitoring was not conducted as required or a violation of OAR 333-061-0040(1) if the monitoring was conducted as required but not reported.

Due to the rule violations identified above, you must immediately monitor for coliform bacteria according to your coliform sampling plan and all other applicable requirements of OAR 333-061-0036(6). Monitoring must be reported to the Oregon Health Authority, Drinking Water Services (DWS) no later than August 10, 2020, according to OAR 333-061-0040(1)(b)(A).

It's most efficient for your laboratory to report the sampling results directly to DWS. You may also submit sampling results using one of the following methods:

- Email the reports to: [dwp.dmce@state.or.us](mailto:dwp.dmce@state.or.us)
- Fax the reports to: (971) 673-0694

*For faxed data, please include a cover page indicating the number of pages (including the cover), your name and your phone number.*

Page 2

If the required monitoring is not reported, it may result in enforcement action, which can include the assessment of civil penalties of \$50 per day per violation as prescribed by OAR 333-061-0090. Please contact me if you have any questions.

Respectfully,

A handwritten signature in black ink, appearing to read "BK Daniels", is written over a light gray rectangular background.
