The Water System is a transient non-community public water system serving approximately 200 people and is subject to regulation under Oregon Revised Statutes 448.115 to 448.290 and Oregon Administrative Rules 333-061-0005 to 333-061-0272.

Amritpreet Singh (hereinafter "Water Supplier"), you are therefore a water supplier as defined in Oregon Revised Statute (ORS) 448.115(12) and Oregon Administrative Rule (OAR) 333-061-0020, and as a water supplier, have specific responsibilities that are identified in OAR 333-061-0025.

Pursuant to its authority established in ORS 431A.010 and ORS 448.255, the Oregon Health Authority, Public Health Division, Center for Health Protection, Drinking Water Services (DWS) has investigated the operation of the Water System.

DWS found, during its investigation that Water Supplier did not consistently report sample results for coliform bacteria and nitrate. Water Supplier is therefore unable to assure its water users that the water is sufficiently free from contaminants such that individuals will not be exposed to disease or harmful physiological effects (ORS 448.115(8)). This represents a potential public health hazard.

This Notice of Violation and Administrative Order (Order) is being issued to Water Supplier for the specific violations of the Oregon Drinking Water Quality Act (ORS 448.115 to ORS 448.290) and rules found during DWS' investigation as described below.

#### DESCRIPTION OF RULE VIOLATIONS

1. OAR 333-061-0036(6)(b) requires, in part, water suppliers to monitor for coliform bacteria at least once every month at public water systems. Additionally, OAR 333-061-0040(1)(b)(A) requires water suppliers to report monitoring required by OAR 333-061-0036 to DWS within 10 days of the end of the required monitoring period. Water Supplier has not reported coliform monitoring for the Water System since reporting a sample collected on May 17, 2023. This constitutes twelve separate violations of OAR 333-061-0036(6)(b), or twelve violations of OAR 333-061-0040(1)(b)(A) if monitoring was conducted but not reported.
2. OAR 333-061-0036(2)(c) requires water suppliers to monitor for nitrate at least once every year at public water systems. Additionally, OAR 333-061-0040(1)(b)(A) requires water suppliers to report monitoring required by OAR 333-061-0036 to DWS within 10 days of the end of the required monitoring period. Water Supplier has not reported nitrate monitoring for the Water System since reporting a sample collected on February 16, 2022. This constitutes one violation of OAR 333-061-0036(2)(c), or one violation of OAR 333-061-0040(1)(b)(A) if monitoring was conducted but not reported.

### ACTIONS REQUIRED TO ACHIEVE COMPLIANCE

Water Supplier is required to conduct the remedial actions described below which, if taken within the time specified in this Order, will constitute compliance with the rule(s) violated (ORS 448.255(3)).

1. Water Supplier must monitor for coliform bacteria at the Water System according to all the applicable provisions of OAR 333-061-0036(6).
  - Routine monitoring for coliform bacteria must begin immediately during the month of June 2024 and the results of this monitoring reported to DWS no later than July 10, 2024.
  - Routine, repeat and source water monitoring for coliform bacteria must continue according to the applicable provisions of OAR 333-061-0036(6), and all monitoring results must be reported to DWS within 10 days of the end of the month according to OAR 333-061-0040(1)(b)(A).
  - Water Supplier will have complied with this corrective action after coliform bacteria monitoring is reported to DWS for six consecutive months according to all the applicable provisions of OAR 333-061-0036(6) and OAR 333-061-0040(1).

This Order does not relieve Water Supplier of any responsibilities or liabilities established pursuant to any applicable federal, state, or local law or regulation.
