## Beef Northwest Feeders, Boardman

Beef Northwest Feeders, LLC (hereinafter “Water Supplier”) is therefore a water supplier as defined in Oregon Revised Statute (ORS) 448.115(12) and Oregon Administrative Rule (OAR) 333-061-0020, and as a water supplier, has specific responsibilities that are identified in OAR 333-061-0025.

Pursuant to its authority established in ORS 431A.010 and ORS 448.255, the Oregon Health Authority, Public Health Division, Center for Health Protection, Drinking Water Services (DWS) has investigated the operation of the Water System.

DWS found, during its investigation, that water provided by the Water System exceeds the maximum contaminant level (MCL) for *E. coli* bacteria. Water Supplier is therefore unable to assure its water users that the water is sufficiently free from contaminants such that individuals will not be exposed to disease or harmful physiological effects (ORS 448.115(8)). This represents a potential public health hazard.

This Notice of Violation and Administrative Order (Order) is being issued to Water Supplier for the specific violations of the Oregon Drinking Water Quality Act (ORS 448.115 to ORS 448.290) and rules found during DWS' investigation as described below.

### DESCRIPTION OF RULE VIOLATIONS

1. OAR 333-061-0030(4) specifies, in part, that the MCL for *E. coli* applies to all public water systems and is exceeded or violated when a total coliform-positive repeat sample follows an *E. coli*-positive routine sample. Coliform monitoring reported for the Water System indicates that on July 3, 2025, a total coliform-positive repeat sample was reported following an *E. coli*-positive routine sample reported on June 27, 2025. This exceeds the MCL for *E. coli* and constitutes a violation of OAR 333-061-0030(4).

Additionally, three *E. coli*-positive routine samples were reported on December 11, 2025, which also constitutes a violation of the MCL for *E. coli* bacteria.

*E. coli* are bacteria whose presence indicates that the water may be contaminated with human or animal wastes. Human pathogens in these wastes can cause short-term effects, such as diarrhea, cramps, nausea, headaches, or other symptoms. They may pose a greater health risk for infants, young children, the elderly, and people with severely compromised immune systems.

ACTIONS REQUIRED TO ACHIEVE COMPLIANCE

Water Supplier is required to conduct the remedial actions described below which, if taken within the time specified in this Order, will constitute compliance with the rule(s) violated (ORS 448.255(3)).

1. Water Supplier must complete corrective action approved by DWS that is expected to reliably prevent *E. coli* bacteria from being present in drinking water provided by the Water System. Corrective action must be completed at the Water System no later than 90 days after the date of service of this Order.
  - Water Supplier must notify DWS in writing no later than five calendar days after completing corrective action.
2. Water Supplier must monitor for coliform bacteria according to all the applicable provisions of OAR 333-061-0036(6) at the Water System no later than 30 days after notifying DWS corrective action was completed according to Compliance Action No. 1.
  - Routine monitoring for coliform bacteria must be conducted every month following completion of corrective action according to Compliance Action No. 1.
  - Routine, repeat and source water monitoring for coliform bacteria must be conducted according to the applicable provisions of OAR 333-061-0036(6) for at least six consecutive months.
  - All monitoring must be reported to DWS according to OAR 333-061-0040(1)(b)(A).
3. Water Supplier will have complied with the Order after:
  - Coliform bacteria monitoring is reported to DWS for six consecutive months according to all the applicable provisions of OAR 333-061-0036(6) and OAR 333-061-0040(1), and
  - *E. coli* bacteria are not present in any drinking water samples collected at the Water System according to this Order.

## GENERAL PROVISIONS AND CIVIL PENALTIES

This Order does not constitute a waiver, suspension or modification of the requirements of the Oregon Drinking Water Quality Act (ORS 448.115 to 448.290) and Oregon Administrative Rules OAR 333-061-0005 to 333-061-0272, which remain in full force and effect.

This Order does not relieve Water Supplier of any responsibilities or liabilities established pursuant to any applicable federal, state, or local law or regulation.

Issuance of this Order is not an election by DWS to forgo any civil actions authorized under the Oregon Drinking Water Quality Act.

Failure to comply with any of the requirements in this Order by the specified due date may result in additional enforcement action, which could include assessment of civil penalties in the amount of \$50 per day per violation (OAR 333-061-0090). For example, if DWS issues a Notice of Intent to Impose Civil Penalty on June 1, 2026 for failure to complete corrective action according to this Order, the proposed civil penalty could be as much as \$1,500.

Pursuant to ORS 448.990(2), violations of a rule of the Oregon Health Authority may be a crime in Oregon and punishable as a Class A misdemeanor.
