

41-00027
CAMELOT MOBILE PARK
CROSS CONNECTION RESOLUTION

Any tenant installing any type of use "permanently" to the Park water system must install a backflow prevention assembly at their water junction to prevent water backflow into the Park water system.

It is the tenant's responsibility to have an annual inspection of the backflow prevention assembly and to provide inspection results to the Park managers.

Any tenant not in compliance with this resolution will have their water access eliminated.

NOTE

ANY TENANT INSTALLING ANYTHING TO THE PARK WATER SYSTEM MUST SUBMIT A WRITTEN PROPOSAL AND HAVE PARK OWNE4R APPROVAL BEFORE PROCEEDING WITH THE INSTALLATION.

Resolved: 5/18/98
