To all tenants

Feb.17 2000

In regards to the parks cross connection program. For those who do not know what the parks cross connection program is, it is the possibility of water being siphoned in our system by way of underground sprinklers.

We must adopt a policy whereby all sprinkler systems must be at least six inches above ground to keep this from happening. If this policy is not adopted all sprinkler systems must have back flow devices installed and being inspected by a certified back flow inspector.

Your usual fine co-operation is appreciated in this matter. If there are any questions or comments on this matter please call the office at 926 -- 9787.

This policy is being adopted with full knowledge of:

Pamela S. Jones-trustee

Loraine C. Smith-trustee

Glenn Dailey, Mgr
