WALLACE ACRES WATER CO.
CROSS CONNECTION CONTROL PROGRAM

A) ENABLING AUTHORITY:

December 13, 1995

Wallace Acres Water Company is a user owned community water company with an elected Board of Directors. The Water Company bylaws give the Board of Directors the authority to promulgate and enforce such rules as are required to meet local, state and federal requirements and to protect the property, assets, and profitability of the water company.

B) WALLACE ACRES SERVICE COMMUNITY:

Wallace Acres Water Company serves 28 member residences. There are no commercial or industrial customers. Current plans are to not accept any new connections to the water system. A current list of members and their addresses are included as a part of this program.

C) CROSS CONNECTION CONTROL REQUIREMENTS:

Wallace Acres Water Company user rules prohibit the use of our domestic water for irrigation or any use outside the home with the exception of filling stock tanks when the irrigation water system is shut off or for the purpose of washing private vehicles.

Rules prohibit permanent connection of the domestic water system to any container or system that might allow a backflow of unsanitary water into the company water system. When hoses are used to fill stock tanks or other containers, rules require that at least a 2 inch air gap be maintained between the end of the hose and the highest possible surface of the water within the container.

Members of the Board of Directors will inspect member residences annually to insure there are no offending cross connections. If any offending connections are found, the members domestic water will be shut off until the offending connection is eliminated. In the future, if the Board elects to allow a member the privilege of connecting a potential polluting device to the system, the member will be required to install a backflow prevention device and obtain annual inspections, of the device, by a licensed inspector at the member owner's own expense.

Wallace Acres Water Company does not have or plan to hire a certified inspector. When and if inspections are required, a qualified inspector will be contracted to complete the required inspections.

**WALLACE ACRES
HOMEOWNERS LIST AS OF 12/14/95**

Anderson, Waldo & Laurie
62290 Wallace Rd
382-1862

Bashford, Bob & Sue
