

4100923

Amendment to the Bylaws of the McKenzie Palisades Water Supply Corp.

Pursuant to Chapter 333, Division 61 of the *Oregon Administrative Rules*, it is the responsibility of the McKenzie Palisades Water Supply to protect its drinking water by instituting and enforcing a cross-connection control program. No cross connections will exist except through prior approval of the board.

Cross connections shall not be created, installed, used or maintained within the water district. The installation or use of an underground sprinkler system may require a backflow prevention assembly. Said assembly, if necessary, shall be the homeowner's responsibility to install and maintain.

In the event of a power outage, it is possible that water in an underground sprinkler system, hot tub, solar system etc. in use at that time could backsiphon into the water system. If backsiphonage should occur, a health hazard could exist.

Failure to comply may result in services terminated.

Dated This Day 6/5/99

Board President
