ADDENDUM TO RENTAL AGREEMENT AND GENERAL RULES & REGULATIONS FOR THE PARKDALE SUBDIVISION AND THE RV SUBDIVISION.

CROSS CONNECTION POLICY FOR PARKDALE WATER SYSTEM.

Water is provided by the **Parkdale Water System** per your rules and regulation as referenced on Page 2 - # 2, Utilities - Item C and Page 5 - Item 10.

Pursuant to Oregon Administrative Rules, Chapter 333, Division 61-070. It is the responsibility of the Parkdale Water System to protect its drinking water by instituting and enforcing an active cross connection control program.

A cross connection is any where a connection is made to the water system.

This program requires the Water System to assume the authority to inspect and enforce the cross connection rules.

You may connect a garden hose, lawn sprinklers and drip systems and etc. to the water system if it is done in a manner so as to prevent any water or contaminated liquid from backing up into any water lines. This will protect the purity of the water for domestic consumption.

The water system is to be protected at any connection to the water system by installing an approved back flow prevention device or assembly. These approved devices and assemblies are normally available where plumbing items are sold.

Authorized representatives of the Parkdale Water System automatically have permission from the home owner / occupant to enter upon the premises at any time for the purpose of inspecting the cross connections on each lot and to each home from time to time. If violations are found, you will be instructed to make necessary corrections at your expense.

If the connections are not properly made so as to prevent pesticides, insecticides, fertilizer and other contaminants from entering the water system, then the Owner/Operator of the Parkdale Water System has the authority to terminate your water service and your use of the water until such a time as you have corrected the improper connection or connections. The installation and any necessary corrections may be done by you or a licensed plumber.

The home owner/occupant shall cooperate with the Parkdale Water System or it's successor, or assigns regarding all government laws, rules and regulation and complying with same.

RV Trust and Parkdale Water System
Vernon Beck, Owner/Operator
