

Section 33. Hot Water

If a meter is damaged by hot water from the customer's line, the customer will be required to pay the cost of repairing the meter and the estimated loss of revenue resulting from the damage. The proper installation and maintenance of a water heater is a customer's responsibility, and no liability will be assumed by the District for water heater damage caused by the delivery or non-delivery of water.

* Section 34. Back Flow Prevention by Customer

In the case of any premises where there is a substance that would be objectionable even if not hazardous to health, if introduced into the District's water system, the utility system shall be protected by an approved double-check valve assembly. In the case of water service to any premises where there is any material hazardous to health, which could be introduced into the District's water system, the District's water system shall be protected by applicable governmental agency regulations. Inspection for the need of back flow prevention devices and annual testing for devices will be performed at the customer's expense according to State Board of Health Administrative Rules.

Section 35. Air in Service Line

The District may adjust a customer's water bill when the customer has notified the District that air has been metered by the water meter. Such notice must be given to the District in writing no longer than five days after the occurrence and a District representative must verify the discharge of air through the meter before an adjustment on the bill may be granted.

Section 36. Penalty

Any person violating any of the provisions of this ordinance, other than those relating to payment or nonpayment of rates or charges, shall upon conviction thereof, be punished by a fine of not more than \$500.00 or by imprisonment for not more than 100 days or both.
