 DRINKING WATER PROGRAM

1, Feb., 96

This Water District has 17 connections.

Cross connection enabling authority.

Board of Directors meeting of 13/Aug./94.

A motion was made and carried to require a back-flow device (Check-Valve) be installed at each meter. This device to be installed by and at the expense of the landowner.

Because of complaints from the Stockholders it became necessary for the Directors at the meeting of 9/Sept/95 to delete this motion.

At the Stockholders meeting of 25/Sept/95 it was voted to require a back-flow valve be installed on homes that have in ground sprinklers, all others may use AVBs on exterior faucets.

This is our written ordinance.

Bernard St. George Sec.
