

# Enabling Authority

RECEIVED  
OCT 05 2017

Water System Name: Old Church Road Estates

Water System PWS ID # 41- 01516 Revised Date: 9/21/2017

Cross Connection  
Drinking Water Program

## Purpose

The purpose of this ordinance is to protect the health of the people served by this water system by preventing contaminants from flowing backwards into the water supply. To accomplish this, these rules are in compliance with Oregon Administrative Rules (OARs) 333-061-0070 through 333-061-0074.

## Requirements

Actual or potential cross connections are prohibited. If a potential exists for a cross connection the water system must be protected by an appropriate backflow prevention device or assembly.

Any high hazards, as specified in the OARs will be given the highest priority, and protected with an approved air gap or reduced pressure backflow assembly.

## Enforcement

The water system has the right to refuse or terminate water service to any customer who does not:

- Install a backflow device or assembly, when an actual or potential cross connection exists.
- Test the assembly at least annually and complete necessary repairs

The water system reserves the right to require a backflow device at the customer's side of the water meter if access is not allowed to determine if a backflow device or assembly is necessary.

The water system will allow a reasonable time to achieve compliance with our rules, but should a backflow incident occur, the water system has the right to terminate service immediately and restore it only after compliance.

## Additional

A list of all high hazard connections and how they are protected from a cross connection is attached to this enabling authority.

There are "NO High Hazard Connections" within this Public Water System as of 9/21/2017

This enabling authority is approved and adopted and will remain in effect as of this date until such time as revised or eliminated.

Tukwila, WA. 98188-2549

Oregon Public Health Division:

Old Church Road Estates, PWS ID # 41-01516 , as of September 22<sup>nd</sup> 2017 has no High Hazard Connections within the Water System.

If any of these conditions occur, we as the Homeowners Association will address this issue as outlined within this Enabling Authority and take action to prevent a possible contamination of the Drinking Water System.

At this point and date of this letter, there are NO Cross Connections within this system, if this occurs, we will have these Backflow Devices tested to prevent any contamination of the system in accordance with State of Oregon Regulations and report as required.
