Enabling Authority

Water System Name: Rogue Riviera Estates Home Owners Association

Water System PWS ID # 41- 06113

Revised Date: September 28, 2021

Purpose:

The purpose of this ordinance is to protect the health of the people served by this water system by preventing contaminants from flowing backwards into the water supply. To accomplish this, these rules are in compliance with Oregon Administrative Rules (OARs) 333-061-0070 through 333-061-0074.

Process:

The Home Owners Association (HOA) will establish a process to ascertain which members currently have an installed back flow device. Secondly, the HOA will understand which members have a possible cross connection issue and request that these members install a back flow device if none exists. This activity will be documented and maintained by the SWS operator and the HOA Board of Directors.

Requirements: Actual cross connections are prohibited. If a potential exists for a cross connection the water system must be protected by an appropriate backflow prevention device or assembly. Any high hazards, as specified in the OARs will be given the highest priority and protected with an approved air gap or reduced pressure backflow assembly.

Enforcement:

The water system has the right to fine any customer who does not:

- Install a backflow device or assembly, when an actual or potential cross connection exists.
- Test the assembly and require the member to complete necessary repairs.

The water system reserves the right to require a backflow device at the customer's side of the water meter if access is not allowed to determine if a backflow device or assembly is necessary. The water system will allow a reasonable time to achieve compliance with our rules, but should a backflow incident occur, the water system has the right to fine the member further until compliance is achieved.

This enabling authority will need to be approved and adopted by the HOA membership at large and will remain in effect as of this date until such time as revised or eliminated.
