**Re: Residual Maintenance Installation (PR#96-2023)
Sunset Acres Water Co-op Inc (PWS ID#00114)
Final Approval**

Dear Amanda:

On October 10, 2023, our office received confirmation that the above project was completed according to the plans submitted and conditions set forth in the August 24, 2023 conditional approval letter.

Final approval is issued at this time, and the facility is approved for use. As mentioned in the conditional approval letter, the water system will be required to conduct two 6- month rounds at the original number of sample sites (5), with the new treatment in use. This new schedule will be available to view on our Data Online page in the next week or so, and will be set for July 2023-December 2023 for the first round. Please work with Jeff Freund with Deschutes County if this first round schedule is too tight for the water system. Also note that installation of chlorine requires an annual raw water source sample for coliform from the well's raw water sample tap. This sample schedule will start in 2024.

If you have any questions, please feel free to call me at (971) 201-9794.

Sincerely,

Carrie Gentry, PE
Regional Engineer
