Re: **Residual maintenance and corrosion control (PR#37-2010)**
Luckiamute Domestic Water Co-op (PWS ID#00538)
Final Approval

Dear Jonathan:

Thank you for your submittal to the Oregon Health Authority's Drinking Water Program (DWP) of additional plan review information for the residual maintenance and corrosion control installations for Luckiamute Domestic Water Co-op. On March 2, 2011, our office received a letter detailing how the water system met the conditions of DWP's June 10, 2010 conditional approval letter.

I note that the operations and maintenance manuals are in the process of being updated; these will be reviewed during Luckiamute's survey later this year.

This completes the *plan review* requirements. The Oregon Health Authority considers the project complete and grants final approval. Thank you for your cooperation. If you have any questions or would like this in an alternate format, please feel free to call me at (971) 673-0191.

Sincerely,

Carrie Gentry, PE
Regional Engineer
Drinking Water Program
