**Re: New Reservoir, Plan Review #135-2023, Rees Training Center, PWS ID #4101136
Conditional Approval**

Dear Brandon:

Thank you for your submittal of plan review information to the Oregon Health Authority's Drinking Water Services (DWS). On October 5, 2023, electronic copies of the plans and specifications were received. On October 18, 2023, a signed Land Use Compatibility Statement was received. On October 20, 2023, a hard copy of the drawings and the review fee of \$825 were received. The project consists of constructing a 30,000-gallon welded steel reservoir along with related piping and appurtenances. **The plans have been reviewed and are approved with the following condition:**

- The outlet of the overflow/drain pipe at the drainage swale must have a flap valve or equivalent.

I have the following comment:

- I note the reservoir drain piping penetrates the sidewall near the floor of the reservoir, which will require that some water be pumped out through the manway to fully drain the reservoir should the need arise.

Upon completion of the project, please verify in writing that the construction was completed according to the submitted plans. If substantial changes are made, a set of record (as-built) drawings must be submitted. Until it is verified that the project meets the construction standards in OAR 333-061-0050 and Final Approval is granted for the project, the new facilities are not approved for use.

If you have any questions or would like this in an alternate format, please feel free to call me at (541) 966-0900 or email at william.h.goss@oha.oregon.gov .

Sincerely,

A handwritten signature in blue ink that reads "William Goss". The signature is fluid and cursive, with a long horizontal stroke extending to the right.

William Goss, PE
Regional Engineer
