LARK
COUNTRY VIEW MOBILE HOME

41-01022

TO: Residents of Country View Mobile Park

In compliance with the Oregon State Health Department the following Ordinance is in effect as of December 31, 1995

In order to protect our community water system from becoming contaminated the following rules must be observed:

1. DO NOT attach a chemical sprayer of any kind (Miracle-Gro, etc.) to your garden hose.
2. DO NOT leave a garden hose submerged in anything which could cause undesirable chemicals to be drawn back into the line should the water system pressure drop.
3. If you have a hot tub that you fill with your garden hose you must install a back flow device where the water comes into your mobile home.
4. DO NOT use garden hose to flush out radiators.

Be advised that if the Oregon State Health Department ever mandates that every mobile home has to have a back flow device to ensure that no contaminated water will get into the Park water system you will be responsible for purchasing a State approved device and the cost of having it installed.

Manager of Country View Mobile Park,
