Enabling Ordinance or Enabling Authority For Small Water Systems

Water System Name: Westerns Carriage Estates

Water System PWS ID#: 41-01032

Date of Water System Approval of this document: 05/15/2015

The purpose of this ordinance is to protect the health of the people served by this water system by preventing contaminants from flowing backwards into the water supply. To accomplish this, these rules are in compliance with OAR 333-061-0070 thru 333-061-0074. This includes installation, maintenance and testing of backflow prevention devices and assemblies; as well as other rules to report backflow data to the Oregon Health Authority every year.

Actual or potential cross connections are prohibited. If a potential exists for a cross connection and this is necessary, the water system must be protected by an appropriate backflow prevention device or assembly. Most high hazards or health hazard are specific in the above listed Oregon Administration Rules. They should be given the highest priority by this water system.

Western Carriage Estates does not have any backflow devices or cross connection devices on our water system.

Western Carriage Estates has no water meters.

Western Carriage Estates receives irrigation water via a canal (ditch) from Talent Irrigation District. All sprinkler systems are separate from the community water system and have no connection to the community water.

Western Carriage Estates has the right to refuse or terminate water service to any customer who does not install a backflow device or assembly, when necessary, test at least annually and repair if necessary the backflow devices on the customer's property.

Western Carriage Estates reserves the right to demand a backflow device at the customer's side of the water meter if access is not allowed to determine if a backflow device or assembly is necessary.

Western Carriage Estates will allow a reasonable time to achieve compliance with our rules, but should a backflow incident occur the water system has the right to terminate service immediately and restore it only after compliance.
