### CROSS CONNECTION ORDINANCE

Anchor Mobile Home Park, Public Water System #4101201, located at 95691 Saunders Creek Road, Gold Beach, Oregon, is a small mobile home park that utilizes a well as the sole source of drinking water for the residents. No other wells or connections exist in the park. All the units in the park are single family dwellings. The park currently has 44 units.

The cross connection contact person for the system is Gary Smith. Additional staff is Glenn Miller, who is an on-site caretaker. Because this system has fewer than 300 connections, no certification is required. Local certified inspectors are available if needed.

Anchor Mobile Home Park follows all applicable plumbing codes and will continue to do so in the future in order to insure that the water system at the park remains free of hazards.

This ordinance is in effect immediately and will remain so until modified or replaced.
