

To: Berndt Subdivision Water Corporation Users
From: Board of Directors, Berndt Subdivision Water Corporation
Re: Terms for Cross-Connection

1. If there is a cross-connection between the potable water and any non-potable water, then the water will be shut off.
2. To help prevent a cross-connection, the water corporation will purchase and distribute to individual families back flow prevention devices to be installed on all outside water bibs.
3. It is the responsibility of all members to notify the water corporation managers if a cross-connection occurs so that appropriate action can be taken to insure a clean water supply.
